**ANNOUNCEMENT  
KLEIN TOOLS SAFETY RECALL**

**Klein Tools has requested that we forward the below important product safety information to all *electrical training ALLIANCE* Training Directors**

---

**IMPORTANT SAFETY RECALL**

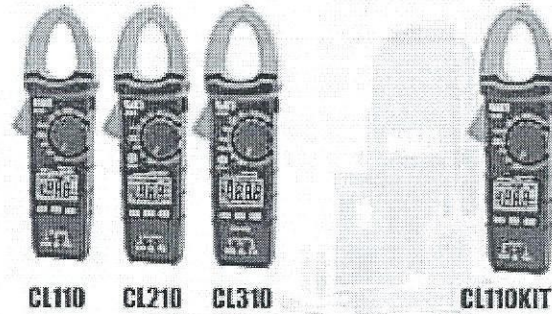

Via Email

May 3, 2016

Re: CL110, CL210, CL310 and CL110KIT Digital Clamp Meters Are  
Being Recalled by Klein Tools

Dear Valued Klein Tools Distributor:

In cooperation with the Consumer Product Safety Commission ("CPSC"), Klein Tools will be conducting a voluntary product recall on four products in its Test and Measurement Line due to a potential safety hazard. These items are the CL110, CL210, CL310 and CL110KIT.

Klein Tools requests that you immediately stop selling these products.

In the very near future, Klein Tools will be providing you with additional information regarding this recall and how to return the products to Klein Tools. Klein Tools will also be issuing a press release and in-store posters to notify end users of the recall of the Meters. We are working with the CPSC to prepare the public announcement of the recall. In order to avoid potential confusion, we ask that you not issue any public communication regarding this recall without receiving prior approval from Klein Tools and the CPSC.

Thank you for your cooperation.

Sincerely,

John McDevitt  
Executive Vice-President Sales & Marketing  
Klein Tools
